

Workshop work trolley h286_61

Steel workshop trolley with 3 shelves with perimeter edges, dimensions 100x60 cm, Ø 160 mm rubber wheels and high-resistance monobloc structure.

The **H286_61** workshop work trolley is a professional solution designed for the transport and systematic organization of tools, equipment and heavy components in industrial contexts. The monobloc structure, made entirely of **sheet steel**, meets the needs for stability and durability required in mechanical workshops and production lines, solving internal material handling issues.

Technical features

- **Construction material:** increased thickness sheet steel for industrial loads.
- **Shelf configuration:** 3 heavy-duty shelves equipped with non-slip perimeter edges on all sides.
- **Overall dimensions:** W 1000 x D 600 x H 190/900 mm.
- **Movement system:** 4 rubber wheels Ø 160 mm, including 2 fixed and 2 swivel for precise maneuvers.
- **Handle:** Ø 18 mm tubular steel handle integrated into the frame.
- **Finish:** epoxy powder coating in RAL 5010 blue, resistant to corrosion and chemical agents.
- **Structure:** welded monobloc, delivered ready for use without the need for assembly.
