

Workshop workbench h826_23

Monobloc steel workshop workbench with sheet metal top, 200x70 cm. Includes 2 triple drawer units and reinforced structure with 500 kg load capacity.

The **monobloc workshop workbench** is a workstation designed for intensive use in industrial and artisanal contexts. The structure is designed to offer maximum stability during heavy manual activities, ensuring safety and operational precision. The frame is made of **metal box sections of various cross-sections**, integrating a reinforcement perimeter under the worktop that ensures the correct distribution of loads and the stable housing of modular components.

To maximize tool organization, the bench is equipped with **two integrated drawer units**, each with three drawers, allowing for efficient compartmentalization of small parts and equipment. The base is provided with pre-drilled plates for **floor fixing**, a fundamental requirement to prevent slipping or tipping in the presence of high mechanical stress.

Technical features

- **Structure:** Monobloc in metal box section
- **Worktop:** Steel sheet with reinforced perimeter frame
- **Equipment:** 2 drawer units (3 drawers each, total 6 drawers)
- **Load capacity:** 500 kg static capacity
- **Safety:** Legs with plates for stable floor fixing
- **Dimensions:** 200 x 70 x H.89 cm
- **Color:** RAL 5015 Blue
