

Workshop workbench h900_05

Professional workbench in solid beech (40 mm), height-adjustable frame and 1250 kg capacity. Dimensions 150x70 cm with drawer included.

This **professional workbench** is designed to support intensive duty cycles in industrial, mechanical and artisanal contexts. The structure stands out for its **40 mm solid beech top**, a choice that combines high mechanical resistance with the ability to absorb vibrations and stresses during work. The square tube frame ensures the necessary stability even under heavy loads, while the **height adjustment** allows the workstation to be configured according to the ergonomic needs of the operator or the nature of the specific activity performed.

Technical features

- **Worktop:** Solid beech with 40 mm thickness
- **Supporting structure:** Reinforced steel square tube frame
- **Height adjustment:** Variable range from 84 cm to 104 cm
- **Storage system:** 1 drawer mounted on roller bearing slides for smooth movement
- **Load capacity:** Maximum static capacity of 1250 kg (evenly distributed)
- **Overall dimensions:** W 1500 x D 700 mm
- **Supply conditions:** Product delivered already assembled and ready for use
