

Workshop workbench h900_07

Professional workbench with 40 mm solid beech top, steel frame and 1250 kg load capacity. Dimensions 150x70 cm with drawer and shelf.

This **professional workbench** is designed to meet the needs of mechanical workshops, craft laboratories and production departments requiring an extremely stable and durable support surface. The combination of the noble wood top and the electro-welded steel frame allows for handling heavy loads and intensive mechanical processing, offering a definitive solution against vibrations and the bending of standard work surfaces.

Technical specifications

- **Worktop:** Ground solid beech with a thickness of 40 mm.
- **Support structure:** High-resistance square steel tube frame.
- **Load capacity:** Maximum static load capacity of 1250 kg.
- **Storage:** 1 drawer with pull-out guides mounted on roller bearings and 1 lower storage shelf.
- **Surface treatment:** High-resistance powder coating against corrosion and chemicals.
- **Dimensions:** W 1500 x D 700 x H 840-1040 mm.
- **Configuration:** Supplied as a pre-assembled monoblock to ensure maximum rigidity.
