

Workshop workbench h905_10

Workshop steel workbench with double reinforced shelf (3 mm and 1.5 mm), dimensions 100x74.5 cm and floor fixing preparation.

The **workshop workbench** represents a robust and functional solution for setting up operational workstations in industrial and craft contexts. The structure is designed to ensure maximum stability during mechanical processing, thanks to the use of a **3 mm steel sheet** work surface and a 1.5 mm lower shelf for organizing components and tools. The two bearing uprights, treated with **epoxy paint** for lasting protection against wear, include pre-drilled holes for secure anchoring to the floor.

Technical features

- **Dimensions:** L. 100 x D. 74.5 x H. 88 cm
- **Top shelf:** steel sheet with 3 mm thickness
- **Bottom shelf:** steel sheet with 1.5 mm thickness
- **Structure:** 2 painted steel uprights
- **Treatment:** high-resistance epoxy paint
- **Fixing:** floor anchoring preparation via holes on the uprights
