

Workshop workbench h965_01

Workshop workbench in steel and wood, 121x61x144.5 cm. Capacity 1800 kg, quick boltless assembly for heavy industrial loads.

The **h965_01 workbench** represents an advanced structural solution for workshops, production departments, and technical laboratories requiring a high-resistance workstation. Designed to solve stability issues in intensive work environments, the bench offers a safe support surface for heavy equipment and mechanical components, while optimizing tool organization thanks to the vertical configuration with back panel.

Technical features

- **Overall dimensions:** W 121 x D 61 x H 144.5 cm
- **Total load capacity:** 1800 kg per module
- **Load capacity per shelf:** 600 kg
- **Assembly system:** Quick boltless interlocking (estimated time 15 minutes)
- **Structure:** Robust 50 mm steel profile
- **Finish:** High-resistance epoxy-polyester powder coating
- **Configuration:** 3 loading levels, including back panel and top shelf
- **Supplied with:** 4 protective plastic feet included
