

Workshop workbench h965_03

Professional workshop workbench in galvanized steel and wood (91x61x144.5 cm). Load capacity 1200 kg, quick boltless assembly and self-stable frame.

The **workshop workbench h965_03** is a high-performance workstation designed to integrate robustness and space optimization in industrial contexts, mechanical workshops, and technical laboratories. Thanks to its vertical configuration with a rear panel, it solves issues related to tool storage in areas with limited square footage, ensuring a stable work surface resistant to mechanical stress.

Technical features

- **Overall dimensions:** L 91 x D 61 x H 144.5 cm
- **Load capacity per single shelf:** 400 kg (with uniformly distributed load)
- **Total load capacity:** 1200 kg per module
- **Structure material:** Galvanized steel with 50 mm load-bearing profile
- **Shelf material:** High-resistance natural wood
- **Assembly system:** Interlocking, boltless (estimated time 15 minutes)
- **Protective finish:** Anti-scratch and anti-corrosion epoxy-polyester painting
- **Equipment:** Rear containment panel and 4 plastic protection feet
