

Worktable capacity 600 kg h965_21

Professional steel workbench with 210 cm MDF top and 600 kg load capacity. Includes integrated drawer and lockable cabinet. The **H965_21 professional workbench** represents an advanced structural solution for production departments, mechanical workshops, and maintenance laboratories. Thanks to its **length of 210 cm**, it allows for easy management of large components or the configuration of multiple assembly stations. The steel load-bearing structure, finished with epoxy powder coating, supports a **35 mm MDF wood top**, ensuring operational rigidity and mechanical resistance even under heavy loads.

Technical features

- **Total dimensions:** W 210 x D 75 x H 86.5 cm
- **Worktop:** 35 mm thick MDF wood
- **Load capacity:** 600 kg distributed on the top
- **Structure:** anthracite-colored painted steel
- **Standard equipment:** 1 metal drawer and 1 cabinet with key lock (internal capacity 50 kg)
- **Installation:** self-supporting system with screw assembly (kit included)
- **Stability:** designed for use without the need for wall anchoring
