

Worktable L. 200 cm 2 drawer units with plinths h870_16

Steel workshop bench with beech multiplex wood top, 2000x800 mm. Double drawer unit with 10 total drawers with a capacity of 75 kg each.

This **professional workshop bench** represents a structured solution for industrial environments requiring a large work surface and high tool storage capacity. Thanks to the combination of steel sheet robustness and the mechanical resistance of the **beech multiplex wood top**, the bench is ideal for heavy mechanical processing, assembly and maintenance. The double drawer unit configuration allows for the rational organization of small parts, measuring instruments and bulky equipment in a single ergonomic workspace.
