

Worm spring rider h749_05

Worm-shaped spring rider in high-resistance HDPE, dimensions 37x26x92 cm, ideal for inclusive play areas and certified playgrounds.

The **h749_05 spring rider** represents a safe and durable play solution for setting up recreational spaces dedicated to early childhood. The structure, characterized by a worm-shaped design with bright colors, is designed to stimulate motor activity and balance in children in total safety. Thanks to the use of advanced technical materials, the device offers high resistance to atmospheric agents and mechanical wear typical of public installations.

Technical specifications

- **Dimensions:** W 37 x D 26 x H 92 cm
- **Material:** 3-layer HDPE (High Density Polyethylene) with 15 mm thickness
- **Age of use:** Recommended between 2 and 6 years
- **Free Fall Height (FFH):** Less than 100 cm
- **Capacity:** 1 user station
- **Safety area:** Minimum required surface of 5 sqm
- **Resistance:** Anti-vandalism and UV-resistant panels
