

Yellow bicycle rack for public spaces h140_539

Urban furniture bicycle rack in galvanized sheet metal with electrical sockets. Dimensions: W 80 x D 16.5 x H 60 cm.

The **H140_539 bicycle rack for public spaces** is an innovative solution that combines **functionality, design, and additional services** for urban mobility. Designed to accommodate **2 bicycles** and integrate into high-traffic outdoor contexts, it is made with a **stylized silhouette in 6 mm thick galvanized sheet metal**, laser-cut and shaped to ensure resistance and precision.

At the center of the structure is a **technical compartment in 3 mm thick galvanized sheet metal** designed to contain electronic components and power **2 Schuko electrical sockets** (one on the front and one on the back), useful for charging electric bicycles or other devices. The compartment is equipped with **security screws** to facilitate any maintenance operations, while the bike rack is supplied **already wired** with a power cable at the base approximately 1 meter long for connection to the public network.

The finish is made with a complete cycle of **anti-corrosion treatments and thermosetting powder coating**, which includes washing, sandblasting, protective primer, and polymerization at 180°C, ensuring **protection against rust, wear, and atmospheric agents**. The steel parts are painted in **RAL 1018 (yellow)** and **RAL 9005 (black)** colors, for a modern contrast and high visibility in urban areas.

Supplied **already assembled with steel screws and assembly instructions**, the bike rack is prepared for ground fixing using **anchor bolts and expansion plugs**. Robust, heavy (25 kg), and stable, it is ideal for squares, stations, schools, parks, and cycle paths.

Offer citizens a safe point for bike parking with integrated charging sockets: choose the **H140_539 bike rack** or request a personalized quote.
