

Yellow crate hand truck h55_140

Electrowelded steel sack truck with curved back, 300 kg capacity and Ø 200 mm elastic rubber wheels. Ideal for cylindrical loads.

The **h55_140 crate and sack hand truck** is an advanced technical solution designed for the safe handling of irregular-shaped loads. Its distinctive feature is the **curved back**, specifically designed to accommodate and stabilize sacks, drums, and soft materials, preventing lateral slipping during transport. It solves critical issues related to last-mile logistics, moving, and the organization of industrial warehouses, offering ergonomic support that reduces the operator's physical effort.

The structure is made of high-quality **electrowelded tubulars and plate**, finished with a RAL1028 yellow acrylic powder coating that ensures high resistance to corrosion and mechanical wear. The movement system relies on top-quality wheels with an **injected aluminum disk** and a vulcanized elastic rubber ring, mounted on ball bearings to ensure smooth movement even under full load on irregular surfaces.

Technical specifications

- **Structure:** Curved back in electrowelded steel tubes and plate
- **Total dimensions:** W 55 x D 45 x H 110 cm
- **Loading toe plate:** 400 x 170 mm
- **Maximum capacity:** 300 kg
- **Net weight:** 13 kg
- **Wheels:** 2 black elastic rubber wheels Ø 200 mm with vulcanized ring and aluminum core
- **Bearings:** Ball bearings, for noise and friction reduction
- **Safety:** Lateral wheel guards and ergonomic handles in non-toxic rubber
- **Chemical resistance:** Wheels resistant to alcohol, salts, and granular substances
- **Surface compatibility:** Stoneware, asphalt, concrete, resin
- **Finish:** RAL1028 yellow acrylic powder coating
- **Compliance:** CE standards
- **Delivery condition:** Product supplied assembled and ready for use
