

Flip-up seat for shower in polypropylene without edges h10736

Shower folding seat for thermoplastic resins, complete with mounting kit

Made in Italy

Folding shower seat for thermoplastic resins. The seat is comfortable because it is folding: when not in use can be stored with ease thanks to the wall fixing. The seat and backrest are made of polyethylene and are free of sharp edges, while the seat is ergonomically designed with a surface engraved photo antispigolo. The seat and backrest are joined by means of two pins.

The schinale is also provided with screws, dowels and bracket for fixing to the wall.
