

Shelves in stainless steel 4 smooth shelves 80x40xh180 cm h11119

Shelf with stainless steel structure 4 smooth shelves. Italian product. The basic element in the hook.

Modular shelf in AISI 304 stainless steel hook. The stainless steel AISI 304 is a type of austenitic stainless steel, the result of a particular mixture of carbon, chromium and nickel. It is characterized by:

- excellent resistance to corrosion
- ease of cleaning
- good hygienic coefficient
- ease of processing
- resistance

The supporting structure is formed by uprights "U" 40x25x40 in thickness of 20/10 mm, which increase the resistance. The shelf is easy to assemble thanks to the hook on the slots to the punch. The shelves are also designed to withstand: are smooth and 8/10 thick, while the uprights have a height of 180 cm and spessore 20/10.

The shelf is full of cross bracing and plastic feet to avoid damaging the surfaces.

Specifications:

- Italian product
- made of stainless steel AISI 304
- basic element to hook
- 4 smooth shelves thickness 8.10
- complete transverse reinforcement
- plastic feet
- anti-cut edges
- glossy finish
- height 180 cm
- width 80 cm
- depth 40 cm

- **Height** 180 cm
- **Width** 80 cm
- **Depth** 40 cm
- **Material** Stainless steel
- **Typology** hook
