

Shelf in stainless steel 4 smooth shelves 200x40xh180 cm h11128

Shelf 4 shelves in stainless steel AISI 304, comfortable and practical. Ideal for professional use.

Shelves made of stainless steel AISI 304, a particular type of steel characterized by a particular mixture of carbon, nickel and chromium, which ensures:

- corrosion resistance
- ease of processing
- ease of washing
- good hygienic coefficient
- lifespan

The racks are modular and 'basic element is a hook with a support structure to "U" 40x25x40 in thickness of 20/10 mm.

Rapid mounting hook on to punch holes. The shelves are smooth in thickness 8.10. The shelving is provided with transverse reinforcement, for greater stability, and rubber feet, for facilitarne the displacement and to avoid the damage to the surfaces where they are placed.

The edges are cut resistant and the finish is glossy.

Specifications:
