

Design polyethylene pot with light option h12702

Pot polyethylene composition sturdy and durable comes in different colors and also version with light

Vase made from polyethylene, a plastic material particularly robust and durable. The vessel is available in different colors and also version with light.

The vase is made of polyethylene, a material non-toxic, 100% recyclable, which makes it possible to produce products with an excellent quality / price ratio. The use of polyethylene, inter alia, gives the vase high properties in terms of lightness, strength, resistance and protection.

The colors used are unalterable and ensure that the vessel can be used both indoors and outdoors.

This vase is a vase from the composition. These vessels have a form that makes them particularly suitable for the cultivation of flowering or green plants that buy most ornamental value especially if grown in a combined manner, with varieties belonging to the same species or different species. The crops are ideal for this class of vessels have shallow roots and a height does not exceed half a meter; varieties are herbaceous, bulbous, fat or suffruticose with erect or flexuous and an extension tend to be horizontal.
