

Suspension lamp made of stainless steel and aluminum h16805

Suspension lamp in aluminum and stainless steel with clear polycarbonate diffuser. Product made in Italy.

Suspension lamp in aluminum and stainless steel with clear polycarbonate diffuser.

The stainless steel, thanks to the content of alloying elements (mainly the percentage of chromium), has the possibility of "self-passivation", that is, to become covered with a layer of oxides invisible, of molecular size, which protects the metal below from corrosion.

The diffuser in transparent polycarbonate is extruded polycarbonate and transparent methacrylate, properties of UV resistance and impact resistance. Product made in Italy.

Specifications:

- Voltage 230 V 50 Hz
- Type E27 26-27mm
- Degree of protection IP44
- class 1
- Size 25cm x 30cm

INFO

- **Height** 25 cm
- **Width** 30 cm
- **Depth** 30 cm
- **Material** Stainless steel
- **Typology** suspension
