Wall lamp in wrought iron h16810

Wall lamp in wrought iron, steel reflector double glazing black / white. Product made ??in Italy.

Wall lamp in wrought treaty treaty in the galvanizing bath.

Galvanizing is the process by which it is applied a coating of zinc on a metal artifact generally of steel to protect it from galvanic corrosion: In fact, it reduces the formation of microcells anodic electrolytic action in the grain boundaries. Zinc is less electronegative (less noble) of the steel, and therefore, in case of breakages or porosity of the protective film, you become the sacrificial anode in the electrolytic corrosion and is consumed if there is closure of the field lines.

The body is worked in wrought iron with a special decoration.

The lamp is equipped with a steel reflector with double glass black / white.

Product made in Italy.

Specifications:

Voltage 230 V 50 Hz Type E27 26-27 mm Degree of protection IP23 class 1

INFO

- Height 49 cm
- Width 107 cm
- Depth 40 cm
- Material wrought iron
- Typology wall
