

Maxi lamppost outdoor cast aluminum h16891

Maxi lamppost outdoor cast aluminum with a light

Lamp post outside maxi made of pressure die-cast aluminium, a material that makes it highly resistant to weathering. The diffuser is in transparent polycarbonate, a material resistant at weather and at the impact.

The connection for the bulb is E27, screw diameter of 27 mm.

The lamp has a degree of protection IP44. IP is a code that summarizes the level of protection of electrical equipment against accidental or intentional contact with the human body or with an object, and protection against water and weather, so important especially when you have to build a plant outdoors. At the end of the fixed IP followed by two digits, the first digit indicates the protection against access of solid bodies, the value of 4 indicates that the equipment is protected against solid bodies larger than 1 mm. The second digit indicates the protection against access of liquids. A value of 4 indicates that the device is protected from splashes.

The lamp is Class 1 insulation, this parameter is a value that indicates the degree of protection from the risk of electric shock due to a fault. Equipment with protection class 1 are those in which in addition to basic insulation is a further protection from the connection, with the classic yellow-green cable with the grounding system of the electrical installation of the building.

Features:

- height 257 cm
- Class 1
- type of connection for the bulb E27
- degree of protection IP44
- voltage 230v 50hz
- width 30 cm
