

Lamppost with two lights with glass diffuser h16899

Lamppost with two lights with glass diffuser

Lamp post outside with two lights with body made of die-cast aluminum, a material that makes it highly resistant to weathering. The diffuser, of bell shape, is made of glass.

The type of connection for the bulb is E27, the lamps diameter are 27 mm.

The lamp has a very high degree of protection: IP55. IP is a code that summarizes the level of protection of electrical equipment against accidental or intentional contact with the human body or with an object, and protection against water and weather, so important especially when you have to build a plant outdoors. It is important that the entire apparatus electrical / optical of our product is adequately protected from the elements (dust, flies, rain, humidity, etc.) in order to maintain the operation in time. At the end of the fixed IP followed by two numbers, the first number indicates the protection against access of solid bodies, the value 5 indicates that the unit is protected against dust. The second number indicates the protection against access of liquids. The value 5 indicates that the unit is protected against water jets.

The lamp is Class 1 insulation, the insulation class is a value that indicates the degree of protection from the risk of electric shock due to a fault. Appliances with protection class 1 are those in which in addition to basic insulation is a further protection from the connection with the grounding system of the electrical installation of the building.

Features:

- height 285 cm
- Class 1
- type of connection for the bulb E27
- degree of protection IP55
- voltage 230v 50hz
- width 100 cm
- diameter lamps 26 cm

INFO

- **Width** 100 cm
- **Material** aluminum
