

## Inground pool 6.25x1.20x3.60 meters with steel frame h17402

Inground pool with dimensions cm 625 x 360 H 120. Kit includes: swimming pool, sand filter, sand filter, skimmer kit, kit connection pool-filter, cleaning kit and extra mat background.

Inground pool with steel frame, a figure eight with the kit. The steel support structure is strong and durable specially treated against corrosion; The pool is made up of a hot PVC K 80 HQ. thickness of 75/100 with anti-UV and anti-algae. The elements that comprise the pool are connected together with profiles produced with special materials, that confer a particular strength and rigidity. The pool should be positioned in a foundation hole specially crafted and finished with coating materials more appropriate.

The kit includes:

- Swimming complete
- Group sand filter 12 m3 / h
- Sand filter (3 25kg bags)
- Kit fixed skimmer (skimmer, jets, hose and Teflon)
- Connection kit for pool filter
- Extra cleaning kit (12 m hose, telescopic suction and fucks PRO)
- Mat background

The system s Kimmer is the simplest and most economical for proper movement of the mirror and the cleaning water. Skimmers are of "funnels" along the edge of the pool through which the water passes to the filtration system to then be rimessa in tub . the water in swimming pools skimmer usually arrives in 6-15 cm height of the board. The number of skimmers needed to ensure an optimal level of cleanliness of the water is calculated based on the surface of the water.

The pool water is sucked into the skimmer and the bottom surface from the cockpit of the bottom, and thanks to the thrust generated by the pump, is conveyed through the piping in the sand filter, where takes place the process of filtration. Inside the filter , the pool water passes through the sand (or cartridge) is free of impurities and deposits. Thereafter, the selector valve of the filter redirects the flow of water to the pool, where you fall through the nozzle inlet .

The mat backing prevents the formation of mold around and under the tub and protects against slips and falls, keeping the area around the pool clean and always in ordine. Il mat to be placed below the pool, it is useful to protect it from possible unevenness of the ground, or by the growth of grass or roots, and for proper installation of the pool.

Specifications:

- Size 6:25 x 3.60 m

- Depth 1,20 mt
- Capacity 21 m3

## INFO
