

Rectangular 4.20x2.65x1.32 meters above ground swimming pool kit h17406

Above ground swimming pool rettangolare. Dimensions cm 420 x 265 H 132. Kit includes: swimming pool, skimmer kit, group sand filter, swimming pool filter connection kit

Rectangular above ground swimming pool, with kit included.

The success of above ground pools is to be found without a shadow of doubt in the cost more affordable and practical in its installation: no need of excavation but a leveling of the ground in the event of a slope. Choose a ground pools is the most appropriate decision to have at hand a corner of relaxation and well-being in casosi have an outdoor space reduced, or you want to accomplish in a short time to be able to disassemble a pool at the end of the season. Another important feature and should not be underestimated is that these pools do not require building permits and are not subject to taxes. Bath polyester coated on both sides treated anti-UV and anti-algae and the structure closed rectangle carrier is constituted by pylons tubular steel treated and painted with a special treatment that allows the pool long stays at temperatures estreme. Le characteristics of the polyester are, in addition to a 'excellent toughness and resilience, high resistance to abrasion, creases and heat, a high modulus of elasticity and a minimum recovery of moisture as well as good resistance to chemical and physical agents. Mainly we distinguish the polyester filters with glass fiber, more robust and long lasting, and the filters in polyethylene blown, cheapest of the above.

Available colors: blue / white or gray / white. Kit includes:

- Swimming kit floating skimmer (skimmer, jets, hose and Teflon)
- Group sand filter 4 m3 / h
- Connection kit for pool filter
- Step Ladder (4 + 4 steps + platform)
- Sand filter (1 bag 20 kg)
- Basic maintenance Kit (screen, test kit, brush, thermometer and fucks aspirafondo)
- Start Kit Plus (1 liter algaecide, 1 kg dichloro beans, 1kg pH plus, and minus 1 kg ph meter ph / chlorine)

The sand filtration is a process of purification of waste water which consists in the removal of suspended solids in the fluid, delfluido realized by passage through a filter consisting of a sand bed, supported by a layer of gravel of variable thickness and by a system of drainage. The material of which consists the filter media is commonly composed of silica, anthracite, garnet or ilmenite. The pool water is sucked into the skimmer and the bottom surface of the bottom of the well, and thanks to the pressure generated by the pump, is conveyed through pipes in the sand filter, where there is the filtration process. Inside the filter, the pool water passes through the sand (or cartridge) is free of impurities and deposits. Then, the selector valve of the filter redirects the flow of water towards the swimming pool, in which there falls through the nozzle inlet.

The Start Plus Kit is the complete kit for starting pools up to 25 m3.

The ladder is made of painted steel treated against rust and corrosion. Non-slip steps and platform. For pools with maximum edge 132 cm. 4 +4 steps + platform.

Specifications:

- Overall dimensions 4.80 x 3.25 m to the ground
- Dimensions bathtub 4.20 x 2.65 m
- 1.32 m depth
- Capacity 12 m3
