

Isothermal floating cover for pool shaped of eight 6,25x3,60 mt h17431

Isothermal floating cover for pool shaped of eight. Italian product.

Isothermal floating cover for pool shaped of eight with maximum dimensions of 6,25x3,60 mt. The isothermal material allows to create an isolation between the water and the external environment, in regardless, prevents the water to evaporate because of the excessive heat, and that the water has cooled down too much during the colder hours of the night.

Thanks to the cover prevents the pool is dirty preventing the fall of leaves and insects, in this way you also save money as they will need smaller quantities of substances necessary for cleaning and less time filtering.

The roof rests on the water with the bubbles facing the water.

Specifications:
