

Design bench in polyethylene h6426

Modern version of the classical garden bench suitable for indoor or outdoor. Made in recyclable UV resistant polyethylene and available in more colors

Bench of innovative design by Paolo Rizzato influential designers of the known Italian furniture company Serralunga. Contemporary reinterpretation of the old garden bench, this bench can be placed in the garden or even in your living room. Its dimensions allow to integrate itself in more contained spaces.

Realized in polyethylene, through-coloured made by rotational moulding process. With additive against UV rays. 100% recyclable. High mechanical resistance, made in great collision-proof plastic and it is declined in several colors

Why choose it? The large, tapered legs are solid and sturdy on any type of ground. The angled chair prevents stagnation from water. The slats of the backrest lets air pass through and allows you to see through the bench. The arched section makes the bench particularly comfortable. Specifications:
